EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

At p. 1, line 1 of the specification, add ---This application claims the priority of US Provisional Application 60/263,588, filed January 23, 2001.---

Claims 7-24 were cancelled by the examiner as being drawn to inventions non-elected WITHOUT traverse.

2. The following is an examiner's statement of reasons for allowance: The closest prior art of record is Schoelkopf et al., US 4,958,026. As applicant correctly notes, this reference is drawn to the use of phenethylamines as synthetic intermediates, while applicant has claimed a genus of phenylmethanamines. While the compounds of the prior art are one-carbon homologs of the presently claimed compounds, the presently claimed compounds would not react in the same fashion as the compounds of the prior art. In the absence of any expectation of similar results, the present compounds are not obvious over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
